

Year 2

Week beginning: 23rd March

Please find below a list of activities to complete during the week. It is not essential that all are done and do not feel limited by this if you have your own ideas too. At school, we do Maths and English every day and would like you to do so on weekdays. The tasks will be different each week. Science, PE and RE are done every week at school so these activities will change weekly. All other subjects are done on rotation so you have two weeks for these ones before new ones will be set after Easter.

If you would like more ideas for online learning and additional activities, please see the list of websites that has been sent out.

English – recount writing

Write a sentence everyday about what you can see or what you have done that day. You could draw a small picture to go with your sentence too. Remember to check your work through for punctuation and to check it makes sense. Try to uplevel it in one way each day with either a better word or extending your idea.

Ongoing: daily reading is a key priority. Make sure you discuss the text and are able to answer questions about it. You could also practise your phonics using games and activities on Phonics Play (website with free games) or Teach Your Monster To Read (free website or app).

Maths - topic: money

Borrow some coins. Can you sort them in different ways? How much are they worth? Can you make different amounts? Play shopping and see if you can find totals and give change.

Ongoing: Ask someone to test you on your 2, 5 and 10 times tables. If you're finding them tricky write them out to practise. As a challenge

try to find the answer to questions like 16×5 or 19×2 . Make up your own and remember to prove your answer.

Science - topic: living things and their habitats

This week what habitats can you think of that are local to you? Some ideas are your garden, the local park or the nature reserve. What microhabitats can you think of? Under a rock, stone or log. What animals do you think might live in these habitats? Draw the animals and label where they live

History - topic: life in Victorian times

Make a poster of things that are the same and things that are different between life now and life in Victorian times. Explain which time you would prefer to live in and why.

Geography – topic: mapping skills

Think about where you live. Draw a map of where your home is, including the route you take to school and other key features such as the park, the shops and even where some of your friends live.

RE- topic: the Easter story

We have learnt about Palm Sunday and the Last Supper. Find out about what happened on Good Friday and Easter Sunday. Draw a picture and write a sentence to explain each day.

PE - topics: ball skills

This week practise the skills we have been learning. Try to throw and catch a ball. Can you do it one handed? Is it trickier if you try with a different ball? How many catches and throws can you do? Try keeping active every day using ideas from BBC supermovers or skipping.

Art - topic: rainforest art

Use what you know about the different animals and plants to create a rainforest picture. You can use colours, paints or different paper to make a collage. If you'd prefer you could do a detailed drawing.

DT - topic: puppets

Have a go making a simple stick puppet using a wooden spoon, a pen or a stick if you have one. Draw and label what you have made.

Music - topic: rhythms

Listen to any music. Can you find the beat? What ways can you think of to keep the beat? What sort of music is it? Explain whether you like it or not and why.

Computing – topic: esafety

This week we would like you to tell us what you know about how to stay safe online. Include top tips and strategies. You could write about it, make a poster or your own idea.
