

## Elm Year 1

### Week beginning: 30th March

Please find below a list of activities to complete during the week. It is not essential that all are done and do not feel limited by this if you have your own ideas too. At school, we do Maths and English every day and would like you to do so on weekdays. The tasks will be different each week. Science, PE and RE are done every week at school so these activities will change weekly. All other subjects are done on rotation so you have two weeks for these ones before new ones will be set after Easter.

If you would like more ideas for online learning and additional activities, please see the list of websites that has been sent out.

#### English – instruction writing

Have a look at home and see what different instructions you can find. There will be instructions on packets, games and many other items. Look at how they have been written. See how many commands and time words you can find. Finally, choose an activity you do daily to write instructions for such as hand washing or cleaning your teeth.

Ongoing: Keep reading! If you have read your school books have a look at the Oxford Owl website. Class log in and username – **Elmyear1** or you can create your own account. You could also practise your phonics using the sounds you were given or games and activities on Phonics Play (website with free games) or Teach Your Monster To Read (free website or app).

#### Maths - topic: time

Using the clock you brought home practise making and telling different times. Start with o'clock and half past. Once you know these, practise quarter past and quarter to intervals. Make a timetable for your day drawing the clock and activity for what you have done.

Ongoing: Practise your number bonds to 10. If someone says a number can you say which number goes with it to make 10? Challenge: Number bonds to 20. Write the days of the week. Challenge: Months of the year

#### Science - topic: signs of spring

Keep a weather diary for the week. When you have done it, think about how the weather is different to the winter.

### History - topic: the Great Fire Of London

What can you find out about this? Draw a timeline of what happened.

### Geography – topic: mapping skills

Think about where you live. When you come back from a walk draw a map to show the route. Can you add details such as a tree, the shops, a friends house?

### RE- topic: the Easter story

Make an Easter card for someone special. If you can't give it to them, send a picture of it to show you are thinking of them!

### PE - topics: ball skills

This week challenge yourself with the skills we have been learning. Try to bounce and catch a ball. Can you do it one handed? Can you do it when walking? Is it trickier if you try with a different ball? How many catches and throws can you do? Try keeping active every day using ideas from BBC supermovers or skipping. What other active games can you play?

### Art - topic: the Great Fire of London

Use what you know about different colours to create a fire picture. You can use colours, paints or different paper to make a collage. If you would prefer you could do a detailed drawing.

### DT - topic: playgrounds

Think about what you like playing on at the playground. Draw a picture and label how it works.

### Music - topic: rhythms

Listen to any music. Can you find the beat? What ways can you think of to keep the beat? What sort of music is it? Explain whether you like it or not and why.

### Computing – topic: esafety

This week we would like you to tell us what you know about how to stay safe online. Include top tips and strategies. You could write about it, make a poster or your own idea.

Have fun

Miss Daniels
