Overview with National Curriculum Objectives

Science Intent

At Oughton, we know that science is essential in today's society for future prosperity.

Science teaching at Oughton aims to provide all children with a strong and secure understanding of the world around them. Children will develop the skills needed to enable them to think scientifically, gain an understanding of scientific processes and the uses and implications of science today and in the future.

The knowledge of Science is taught through the teaching of Biology, Chemistry and Physics. Scientific enquiry skills are embedded in all topics taught at Oughton and key skills are developed as the children progress each year. This allows them to build upon knowledge gained in previous years and ensures it is retained into the long-term memory. Specialist vocabulary is taught during each topic and the children are encouraged to use new vocabulary inside and outside of the classroom. The skills of observation, planning, investigating and concluding using scientific vocabulary allows them to become independent learners and question the world around them.

We aim to ensure children:

- develop an interest in the world around them.
- learn and retain key scientific knowledge and vocabulary.
- have regular opportunities to carry out experiments and develop investigative skills.
- are confident in asking, discussing and answering scientific questions.

We are using the Herts for Learning assessment format to show progress and attainment in Science.

| Year Group | Autumn 1 | Autumn 2 | Spring 1 | Spring 2 | Summer 1 | Summer 2 |
|--|---|----------|----------|----------|----------|----------|
| Early Years Nursery and Reception Links to Understanding of the World | Explore the natural world around them, making observations and drawing pictures of animals and plants Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class Understand some important processes and changes in the natural world around them, including the seasons | | | | | |

| Year Group | Autumn 1 | Autumn 2 | Spring 1 | Spring 2 | Summer 1 | Summer 2 | |
|------------|--|--|--|---|---|----------|--|
| Year 6 | <p>Animals including Humans</p> <p>Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood.</p> <p>Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function.</p> <p>Describe the ways in which nutrients and water are transported within animals, including humans.</p> | <p>Light</p> <p>Recognise that light appears to travel in straight lines.</p> <p>Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye.</p> <p>Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.</p> <p>Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.</p> | <p>Living things and their habitats</p> <p>Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals.</p> <p>Give reasons for classifying plants and animals based on specific characteristics.</p> | <p>Evolution and inheritance</p> <p>Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago.</p> <p>Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents.</p> <p>Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.</p> | <p>Electricity</p> <p>Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit.</p> <p>Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches.</p> <p>Use recognised symbols when representing a simple circuit in a diagram.</p> | | |

Science planning uses an amalgamation of the ASE PLAN resources, explorify and Twinkl Scheme of work. Scientific enquiry uses the Herts for Learning wheel for progression of skills. The order of topics in each year may change.

Subject: Science

Overview with National Curriculum Objectives

We comply with the Equality Act 2010 and the Special Educational Needs and Disability Regulation 2014 by ensuring that the Science Curriculum is accessible for **all** learners through adaptations to meet the needs of our children.

Promoting British Values at Oughton Primary and Nursery School:

There are opportunities for the promotion of British Values throughout the Science Curriculum, focusing on:

Democracy, The Rule of Law, Individual Liberty, Mutual Respect and Tolerance of those of different faiths and beliefs

Science promotes these values through discussions and enquiries focusing on fair testing and curiosity.

Positive attitudes and behaviour for learning is promoted throughout the school, following our Promoting Positive Behaviour Policy.

Parents / Carers - if you wish to find out more about our Science Curriculum, please email admin@oughton.herts.sch.uk and ask the Science Subject Leader or member of the Science Team to contact you.
